**RE: American Contracting & Environmental Services, Inc.  
Letter of Recommendation**

To Whom It May Concern:

We are writing to highly recommend American Contracting & Environmental Services, Inc. (ACE) as a general contractor. It has been refreshing to work with a company that understands and is dedicated to the "team" approach. Working with American Contracting has been an example of how well projects can be executed when the general contractor is as invested in the final product as the end-user.

The new Greensboro Regional Wastewater System replaces the existing treatment plant and connects to homes in not only the Town of Greensboro, but also the Town of Goldsboro, many of the homes in Goldsboro are on failing septic systems. The construction of the new wastewater treatment plant project was the first step in the overhaul of the antiquated treatment processes of Greensboro. American Contracting's attention to detail and pre-planning allowed them to identify challenges early-on and develop solutions that minimized costs to the town. We enjoyed working with a general contractor who consistently put our needs, both current and future, at the forefront of their decision-making. When interacting with American Contracting, we were always impressed by their knowledge of the industry and best construction options & practices.

In closing, the Town of Greensboro would like to thank American Contracting for their extraordinary efforts and offer our most sincere gratitude. We recognize and appreciate your contributions as an important ingredient in the success of this system renovation. If you have any questions or would like additional information, please feel free to contact me at (410) 482-6935.

Sincerely,

David Kibler  
Public Works Director
